Re: State Project 0219-A-002  
CIA Entrance at Route 123

Dear Mr. Shaver:

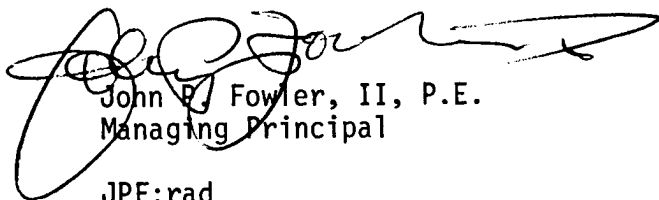

Considerable discussion regarding roadway network assumptions and traffic growth rates took place at the CIA Traffic Advisory Committee Meeting last Tuesday. As a result, I indicated that we would summarize the assumptions made with regard to highway facilities, traffic forecasts and traffic control measures to be implemented by the CIA. We also promised to comment on the traffic growth rate assumed for the study.

Accordingly, I am attaching a draft of a document which has been prepared for distribution to the Advisory Committee. It is divided into three parts, each dealing with the three issues described above.

Please provide comments for incorporation prior to distribution.

Yours very truly,

DEWBERRY & DAVIS
